Applicant's arguments filed 6-11-02 have been fully considered but they are not persuasive.

Double Patenting rejection is withdrawn in light of applicants' properly filed Terminal Disclaimer.

Upon further consideration the following new grounds of rejection is held necessary.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

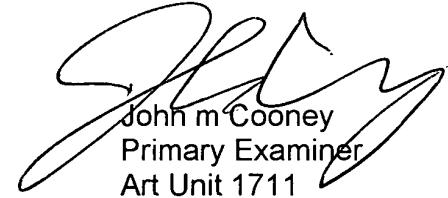

Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dorman et al.(4,636,526).

Dorman et al. discloses biocompatible polymer compositions which contain water soluble, leachable components, inclusive of sodium chloride, which are utilized as prosthetic devices, alone, or in conjunction with conventional prostheses (see the entire document). Dorman differs from the claims in that additional pore formation is not enacted by the inclusion of gas. However, it is well within the skill of the ordinary practitioner to entrain gas within organic, polymeric materials for the purpose of reduction of densities and material costs. Accordingly, it would have been obvious for one having ordinary skill in the art to have entrained gas in the polymer materials of Dorman et al. in order to arrive at the products and processes of applicants' claims in the absence of a showing of new or unexpected results.
